

A Spectral Regularization Framework for Multi-Task Structure Learning

A. Argyriou, C. A. Micchelli, M. Pontil, Y. Ying ID W7

minimize $\text{Err}(W) + \gamma \text{Penalty}(W, D)$

Alternating minimization algorithm

- Learn **tasks' parameters** W (e.g. using SVMs)
- Learn **structure matrix** D as a **spectral** function of W (often has closed-form solution)
